

5 Star Service

# SURPLUS EQUIPMENT REMOVAL

EXPERIENCE WORKS.

TDI, utilizing its 5 Star Service Program, has successfully completed numerous Surplus Removal Projects ranging from entire Hot Strip Mills and Tandem Cold Mills to Motors and EAF Transformers. We have worked with many of the metal industries largest companies, representing their surplus equipment, finding buyers, dismantling, removing and shipping the equipment. Some of TDI's most recent clients include well known companies such as ArcelorMittal, AK Steel, Charter Steel, Nucor and Severstal. This newsletter contains highlights of TDI's most memorable projects.

## Bar Mill Removal Cleveland, OH

TDI dismantled, cleaned, match marked and packed approximately 12,000 tons of equipment for a Bar Mill located in Ohio. The equipment was shipped by truck to the purchaser in Mexico. TDI coordinated the entire project including shipping.

**Project Completion: 6 Months**

## Temper Mill Removal East Chicago, IN

A United Temper Mill was sold to a client in Italy. TDI dismantled, removed, cleaned and export packaged the mill and associated equipment for delivery to the Port of Baltimore for overseas transport. The mill stands required special trailers for hauling which TDI coordinated with the trucking firm.

**Project Completion: 2 Months**

TDI will successfully complete your project from start to finish. Along with helping find a buyer for your surplus equipment, TDI will dismantle, match mark, remove, package and ship the equipment to its final destination, handling all of the details so you don't have to.

TDI can also refurbish your existing plant equipment and restore it to its original functionality. TDI's staff of Engineers and Shop Personnel will redesign and rebuild or upgrade your existing piece of equipment and provide re-installation to prepare your equipment to be put back into service.

TDI welcomes the opportunity to meet and discuss these experiences with you and how they relate to your current project. We can further explain how this experience and knowledge can be a direct benefit to your organization and your specific project requirements.

## Plate Mill Removal Baltimore, MD

The Plate Mill from Sparrows Point was removed, dismantled, match marked, cleaned and export packaged for delivery to the buyer in Turkey. The equipment was shipped by truck to the Port of Baltimore.

**Project Completion: 8 Months**

## Cold Mills & Annealing Furnace Chicago, IL

TDI removed two Cold Mills and an Annealing Furnace for a purchaser in India. The equipment was dismantled, match marked, cleaned and export packaged and sent by barge to the Port of New Orleans.

**Project Completion: 6 Months**

## EAF Transformer Birmingham, AL

TDI brokered the sale of a surplus EAF Transformer located in Alabama to a buyer in Ohio. Due to its size and weight, the unit was transported by rail. TDI coordinated all transportation logistics, including on-site removal, rail loading and delivery.

**Project Completion: 2 Weeks**

## Special Projects Consulting Team

TDI can provide a Special Projects Consulting Team with vast knowledge in the metals industry for your specific project. This team of accomplished consultants have world wide experience with a dedication to customer service and successful completion of each assignment they undertake. TDI's consulting teams are comprised of professionals that are committed to ensuring each project is completed as effectively and efficiently as possible, alleviating stressful situations that may arise for our client and honoring TDI's 5 Star Service commitment to each and every project.

## Hot Strip & Tandem Cold Mill Removal Montreal, Quebec

The Hot Strip Mill and Tandem Cold Mill, both located in Montreal, were dismantled, cleaned, match marked and export packaged for shipment to India. The challenge was working with Canadian officials to ensure the project met all Canadian requirements.

## (2) 6000 HP Motors Middletown, OH

TDI brokered the sale of (2) 6000 HP Motors to a client in Italy. The motors were removed and shipped by truck to the Port of Baltimore. The armature was too heavy to ship by truck so TDI arranged rail transportation to the port.

**Project Completion: 2 Months**

## 250 Ton Hot Metal Crane Detroit, MI

TDI purchased and then resold a 250 ton Hot Metal Crane from Detroit to an end user in Alabama. The crane was rebuilt with all new control and up-rated to 310 tons. TDI coordinated the removal, on-site cleaning and sand blasting, primer and shipment to rebuild shops and the end use purchaser.

**Project Completion: 6 Weeks**
